# Problem

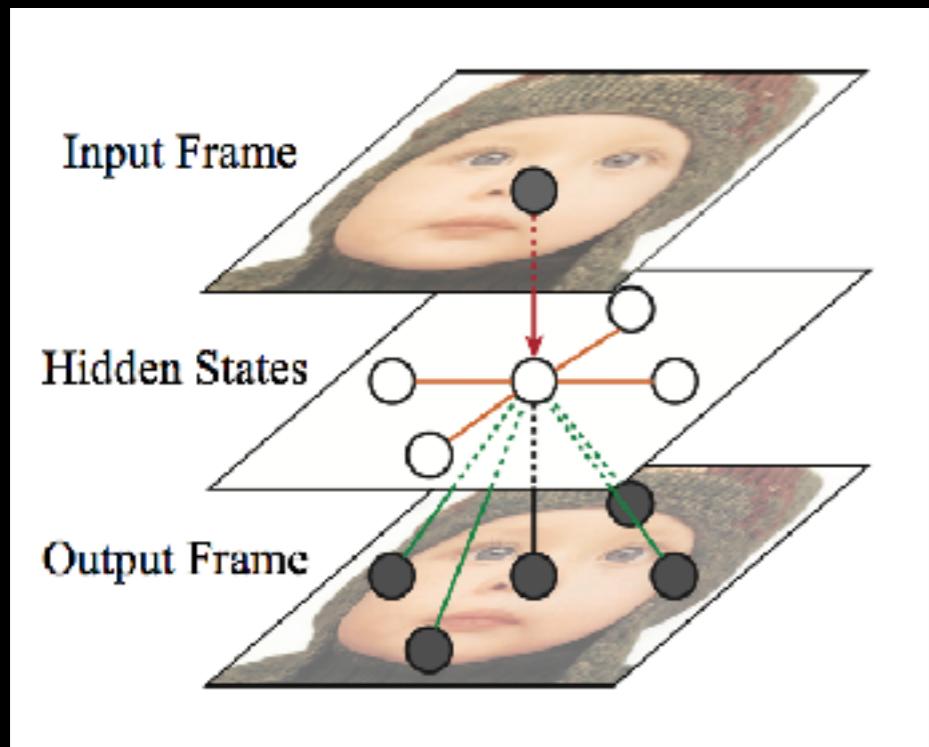

Video interpolation/extrapolation

# Challenges

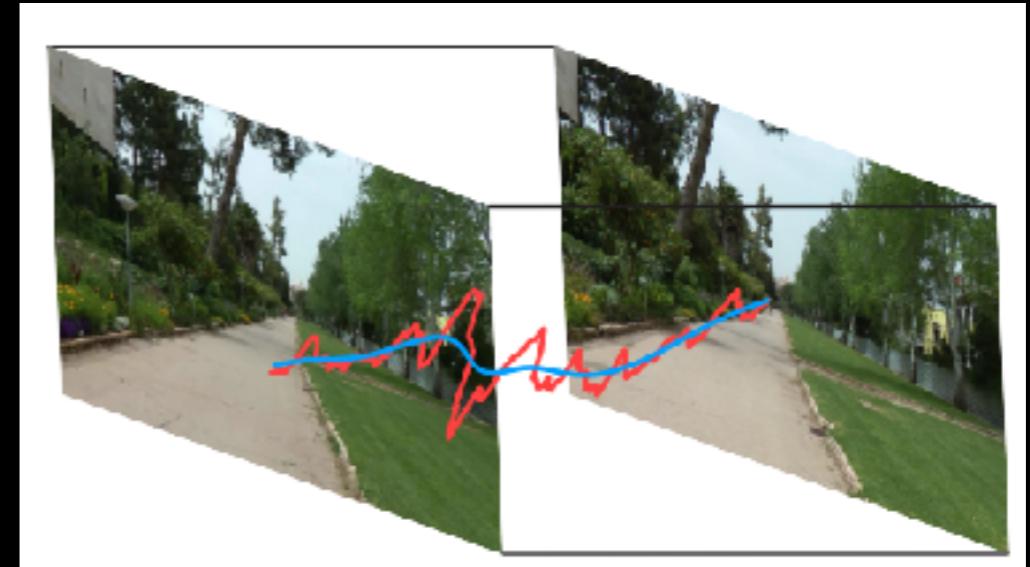

1. Complex motion (camera motion & scene motion)
2. High-res images (1280 \* 720)

# Previous Attempts

Hallucination-based Methods

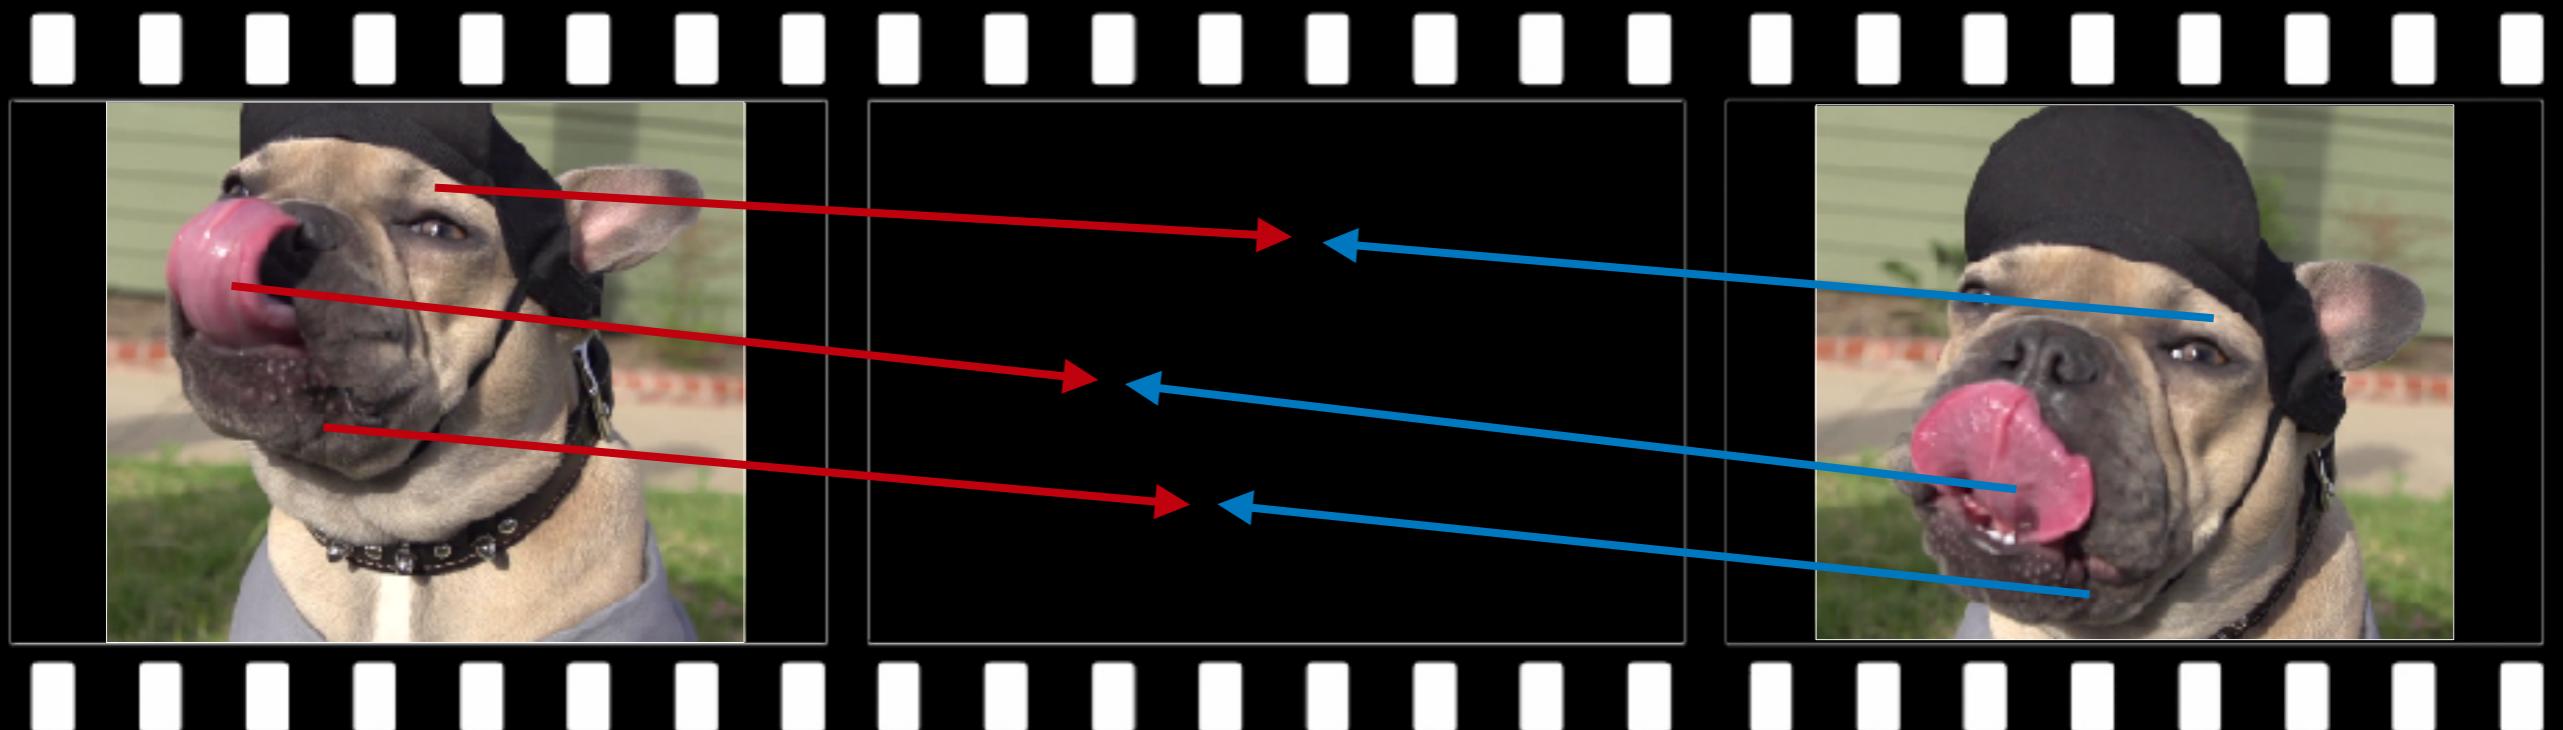

[Ranzato et al.], [Srivastava et al.], [Mathieu et al.]

Flow-based Methods

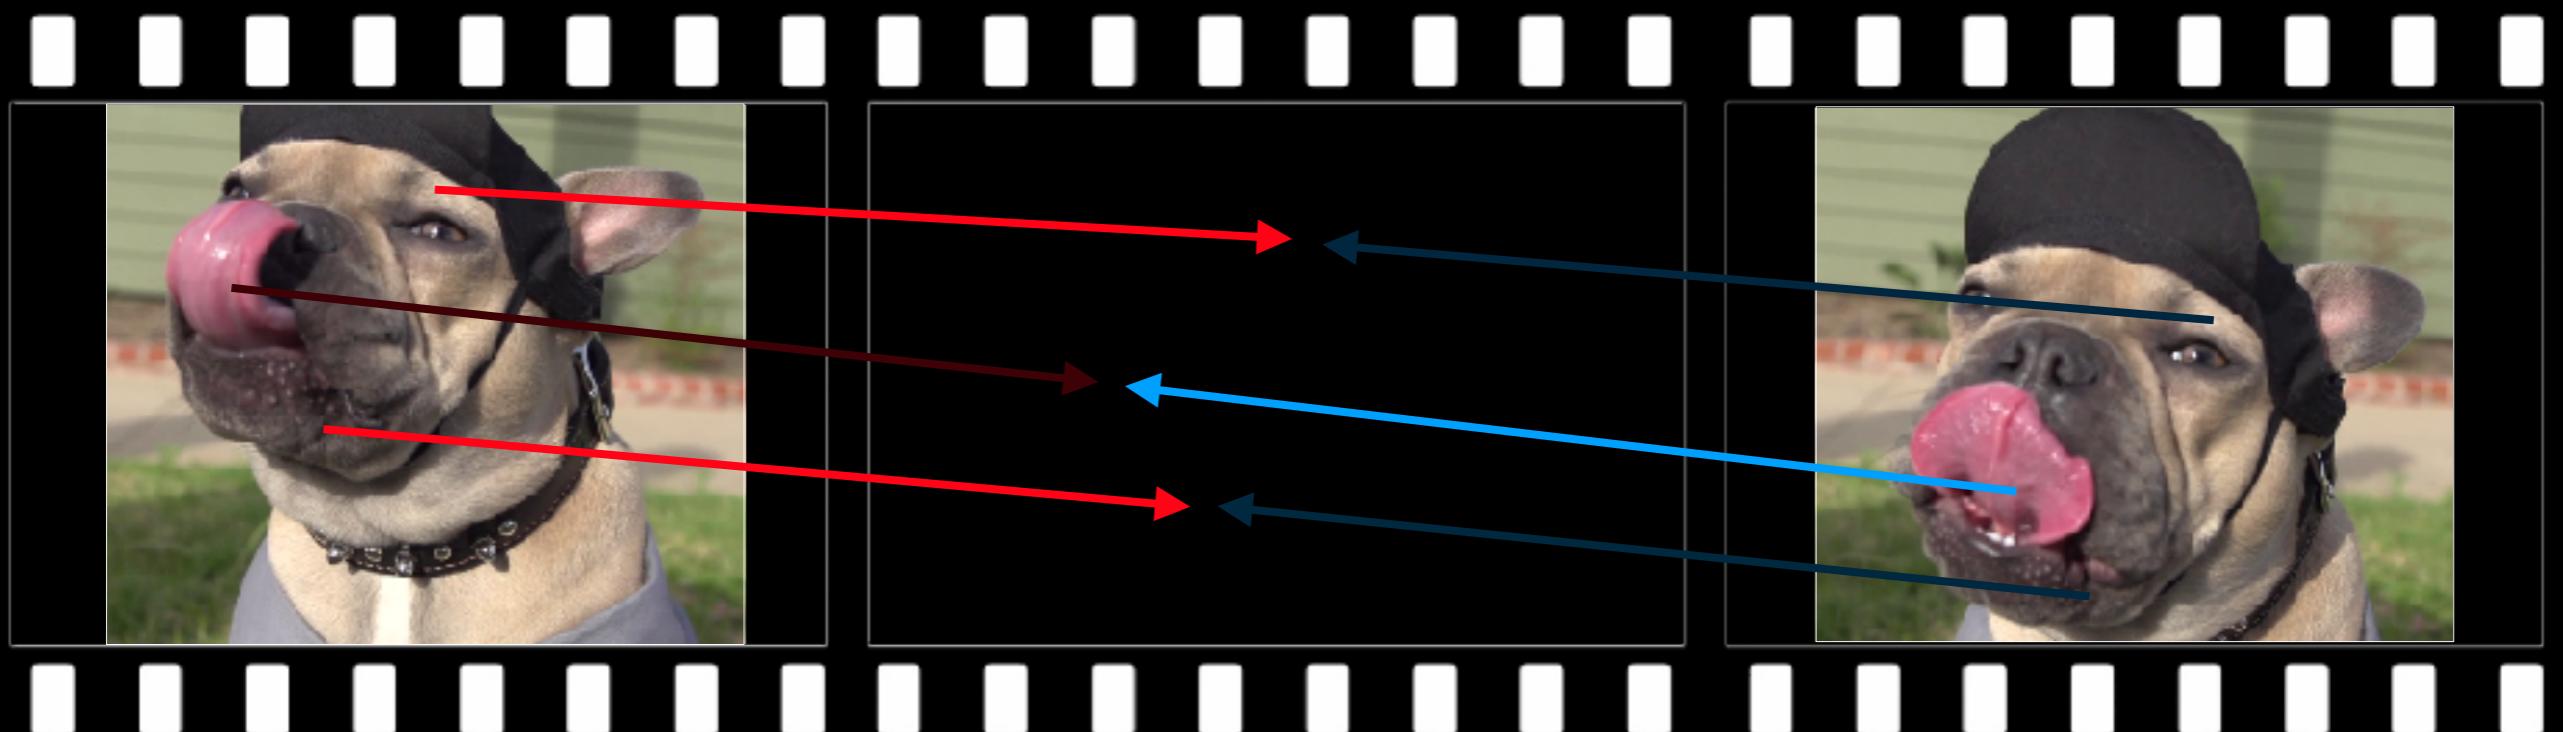

[Baker et al.], [Mahajan et al.], [Walker et al.]

# Conclusions

- Unified motion representation
- End-to-end learning system
- Long-range dependencies in the future

# Thanks!
